Questions &

Answers

ON HOMOSEXUALITY

*from the
New Zealand*

NATIONAL FRONT

Q: What is your position on homosexuality?

A: The National Front position on homosexuality is crystal clear and unequivocal: Homosexuality is an unnatural perversion of the life-instinct, and as such it is totally incompatible with upon which the nationalist world view is based.

Q: In what ways is it “an unnatural perversion of the life-instinct?”

A: There are two primary functions of the sex drive among the higher animals in the natural world of which Man is part.

The first of these is the procreative or reproductive urge, which is necessary for the continuation of the species.

The second function is to aid in pair-bonding of parents. This helps ensure the maintenance of a stable family unit, the purpose of which is to provide a secure and healthy environment for the parents offspring until they become adults.

These are the only two natural functions of the sex drive. Homosexual behaviour is virtually unknown among animals living in a natural state.

Historically speaking homosexuality is only widespread among civilisations during periods of decadence and decline, when many other forms of degeneracy, sexual and otherwise, are also prominent.

Q: Then your Party does not accept homosexuals as members?

A: Most definitely not.

Q: What would happen to homosexuals in the new nation that you propose to create?

A: Nothing would happen to them, because they would not be allowed to be a part of our society. Homosexuals, like Marxists and other undesirable elements whose lifestyles or beliefs are unnatural or contravene the goals of our community, will not be permitted to reside within the borders of this new nation. We don't care where they go, but they will have to leave.

Q: What will you do to prevent homosexuality from breaking out among future generations in a nation free of homosexuals

A: A very important part of our policy is “We demand the strengthening of the family unit as an indispensable cornerstone of a healthy society. We feel that a society with a could family unit in which there are clear-cut and well defined roles for the father and mother will prevent young people from developing homosexual orientation during their impressionable formative years. Beyond that, the new order we intend to build will be based on natural values, and will not prove a favourable breeding ground for any form of degeneracy, be it sexual, political, racial or spiritual.
