

why YOU should Join the New Zealand National Front

STRENGTH IN UNITY

As a member of the NZNF you will be doing something about what is happening to your country, instead of just complaining about it. You will be joining your strength to that of many other men and women with the same beliefs and goals.

Working alone accomplishes very little.

Working in concert with others means you can have a much greater effect on the course of events around you.

MAKING YOUR LIFE COUNT

Nothing in life is more satisfying or fulfilling than making a commitment to a great and impersonal goal and devoting one's talents and energies to its achievements.

As and NZNF member you will be taking a hand in shaping the future and in determining the destiny of your people. By doing so you will share in its immortality

A NECESSARY TASK

In addition to the personal satisfaction and fulfillment of doing something that really matters you should join the NZNF because it is the right thing to do. Any Euro-New Zealander who can see the treat to the future of the nation today and refuses, whether from cowardice or selfishness, to stand up for his people does not deserve to be counted among them. The task of the NZNF is an extraordinary difficult one, but it is necessary. That should be the only consideration for any man or woman with a fully developed sense of responsibility.

A RESPONSIBLE GOVERNMENT

We must have a government wholly committed to the service of our people and not subject to any alien influence. It must be a Government guided by fixed principles, yet able to respond in a flexible way to challenges and opportunities It must be structured in a way suited to its purpose of safeguarding and advancing the people. It must be immune to corruption and subversion as human genius can make it.

We need a Government whose every branch is staffed by people carefully selected and trained for their responsibilities. We need a Government of men and women who actually respect the institution they represent. The organisations which prepare these people for their work must be incorruptible and single-minded with

our principles engraved in the souls of its teachers.

A NEW EDUCATIONAL SYSTEM

A proper educational system serves three purposes - it passes a people's cultural, intellectual and spiritual heritage from generation to generation, it teaches skills and techniques; and it guides the character development of individuals, from childhood to adulthood.

The first purpose is served by teaching facts and ideas - Language, History, Science, Ethics, and so on.

The second purpose is served by teaching the child how to do things that will be useful to himself and/or society.

The third purpose is served by challenging, testing and conditioning. By teaching the child to exercise his will. To discipline himself, to endure discomfort and overcome fears, to accept responsibility, to truthfully and generally develop and strengthen those traits of character valued by a healthy society.

The present system completely neglects the third purpose, and does poorly with the first two. It is, however, by pursuing the third purpose that the educational system will make the most radical contribution.

Our children are growing up in a world without standards of character and clear guidelines of behaviour. We see the products of this system all around us. We need to restructure the system to ensure each child is given the opportunity to evolve into the strongest, most capable and responsible adult he or she can be. The greatest gift we can give them is a return of their sense of identity and heritage, and a return to traditional values and beliefs.
